PROFILE

I'm currently graduated from Bachelor of Computer Science at AMIKOM University Yogyakarta, specializing in Information Systems. I have enthusiasm with Website and Mobile Developer. I like to try and practice to implement scripts that can provide an interesting user experience. For Mobile Developer, I received training from Bangkit Academy which helped me to understand more about android developer and also teamwork when working on Capstone or final project in the form of android application by integrating machine learning and Cloud Service. then I am currently interning at PT Javan Cipta Solusi for the position of PHP Programmer, but here I am also trained to work on Front End tasks with React and Typescript.

COURSE & CERTIFICATION

- *Bangkit Academy 2023 By Google, GoTo, Traveloka* 2023

EDUCATION

Universitas Amikom Yogyakarta *Sleman, Yogyakarta*
Bachelor of Computer Science – GPA: 3.78 out of 4.00 2020 – 2024
Information System

SMA Negeri 1 Slawi *Slawi, Jawa Tengah*
Science major 2017-2020

WORK EXPERIENCE

PHP PROGRAMMER INTERN in PT Javan Cipta Solusi *June 24 – Currently*

- I'm working on an internal project where I am working on the API and also doing integration on the front end. Which is made to help the QA Department in doing their tasks.
- I also created UI for some pages in the project.
- My role in the project is Backend but sometimes I am also frontend. Tech Stack: PHP, Laravel, React, TypeScript.

PROJECTS

GrandezzaID – WEBSITE (<https://grandezzaid.000webhostapp.com/>)

- GrandezzaID is a medical and non-medical mask sales platform with online services.
- My role in the project is Frontend and Backend. Tech Stack: HTML, CSS, CodeIgniter 3, Bootstrap.
- The Grandezza.ID project is a project to fulfill the requirements for passing the Project Management and E-Commerce concentration course.

StoryApps – Mobile/Android (https://github.com/AHanif52/Submision_intermediate)

- StoryApps is a platform to share experiences or memories in the form of photos and can be followed by captions.
- My role in the project is Frontend. Tech Stack: Kotlin, Android Studio IDE.

- The StoryApps project is a requirement for passing the course from Dicoding for the Intermediate android development module.

LigaEnggres - Mobile/Android (<https://github.com/AHanif52/LigaEnggres>)

- LigaEnggres is an English league club list platform, the application implements clean architecture, kotlin coroutine, encryption on the database and also implements dependency injection using the koin library.
- My role in the project is Frontend. Tech Stack: Kotlin, Android Studio IDE.
- LigaEnggres project is a requirement to pass the course from Dicoding for the android development expert module.

Village API – Back End Project (<https://github.com/AHanif52/memento-mori>)

- Village API is a REST API for village data in Indonesia. Using the CodeIgniter 3 Framework by using libraries from <https://github.com/ardisaurus/ci-restserver>.
- I also created a REST API using the Laravel Framework for the same project ([Link](#)).
- The data I used in this project <https://github.com/laravolt/indonesia>.
- My role in the project is Backend. Tech Stack: PHP, CodeIgniter 3, Laravel.

SKILLS SUMMARY

- **Language Programming:** HTML (Expert), CSS (Intermediate), JavaScript (Intermediate), C++ (Beginner), PHP(Intermediate), Kotlin (Intermediate), TypeScript (Beginner), Node.js (Beginner).
- **Frameworks:** CodeIgniter, Laravel, React.
- **Tools:** MySQL, PostgreSQL, Apidog, Postman.
- **Platforms:** Android Studio, Visual Studio Code.
- **Language:** Indonesian and English.
- **Soft Skills:** Setting Realistic goals, Willingness to Learn, Adaptability.
- **Certificates and Trainings:** Belajar Dasar Pemrograman JavaScript (Dicoding), Memulai Pemrograman dengan Kotlin (Dicoding), Belajar Membuat Aplikasi Android untuk Pemula (Dicoding), Belajar Fundamental Aplikasi Android (Dicoding), Belajar Prinsip Pemrograman SOLID (Dicoding), Belajar Pengembangan Aplikasi Android Intermediate (Dicoding), Belajar Dasar UX Design (Dicoding), Belajar Membuat Aplikasi Android dengan Jetpack Compose (Dicoding), Menjadi Android Developer Expert (Dicoding).
