Mohammad Aufa Hanif

Project Analyst | Business & System Analyst

Kota Tegal, Jawa Tengah, 52193 | Contact: +62-8224-2640-735 | aufahanif85@gmail.com | LinkedIn | Portfolio Website | GitHub Repositories

PROFILE

Project Analyst with 2+ years of experience in business and system analysis for enterprise clients in telecommunications and finance. I lead requirement gathering with client users, manage project scope, plan delivery timelines and run User Acceptance Testing (UAT), and I translate business needs into BPMN diagrams, ERDs, mockups, user stories and test cases. My background as a PHP Programmer (Laravel, React, TypeScript) helps me write specifications that developers can build from without guessing. Computer Science graduate in Information Systems from AMIKOM University Yogyakarta and Bangkit Academy 2023 alumnus.

COURSE & CERTIFICATION

- *Bangkit Academy 2023 By Google, GoTo, Traveloka* *2023*

EDUCATION

Universitas Amikom Yogyakarta *Sleman, Yogyakarta*
Bachelor of Computer Science – GPA: 3.78 out of 4.00 *2020 – 2024*
Information System

SMA Negeri 1 Slawi *Slawi, Jawa Tengah*
Science major *2017 – 2020*

WORK EXPERIENCE

PROJECT ANALYST in PT Javan Cipta Solusi *June 2026 – Currently*

- Requirement Gathering: Lead requirement sessions directly with client users and translate them into user stories, user journeys and acceptance criteria.
- Scope Management: Own project scope and change requests, a responsibility that moved to Project Analyst when the Product Owner role was merged into it.
- Timeline Planning: Coordinate with the Tribe Lead to set the project Gantt chart and delivery timeline.
- User Acceptance Testing: Lead UAT sessions with client users and follow feedback through to sign-off.
- System Analysis: Continue designing BPMN diagrams, ERDs, mockups, test cases and task specifications for the development team.

SYSTEM ANALYST in PT Javan Cipta Solusi *(Intern → Contract)* *July 2024 – June 2026*

- Business Process Analysis & Optimization: Assisted clients in automating workflows and translating their needs into efficient system solutions.
- Workflow Design & Validation: Created BPMN diagrams and utilized Camunda to ensure optimal process execution.
- Database Architecture & System Mockups: Designed ERDs and UI/UX prototypes to align with user needs.
- Collaboration with Developers: Worked closely with development teams to build applications according to technical specifications.
- Testing & Documentation: Conducted API/UI testing, triaged production issues and created clear system documentation for users and maintenance teams.

PHP PROGRAMMER INTERN in PT Javan Cipta Solusi *June 2024 – July 2024*

- Built the API and frontend integration for an internal project that helps the QA Department with their tasks.
- Created UI for several pages in the project. Tech Stack: PHP, Laravel, React, TypeScript.

PROJECTS

As Project Analyst / System Analyst

Link Net (2024 – Present) – System Analyst → Project Analyst

- E2E Phase 2 (2026): As-Built Drawing (ABD) workflow for fiber rollout across the Backbone, FO OLT and Lastmile & Feeder modules, where vendors submit KMZ route maps, as-built documents and acceptance photos for multi-level review and handover to maintenance.
- Wrote about 165 user stories plus the SRS, ERD and BPMN. The BPMN passed validation and was deployed, and Link Net approved the mockup journey in June 2026.
- Mapped 128 test cases to backend and frontend tasks, catalogued 204 APIs, and automated 32 dashboard test cases with Playwright.
- Specified KMZ file validation, bulk upload, about 20 role-based notifications and 3 monitoring dashboards, and supported the production release in August 2026.
- 2024 – 2025: Web-based system for end-to-end FTTH (Fiber To The Home) development, from data input to approval, with BPMN validated in Camunda, ERDs, mockups and API/UI testing.
- CR POC Boundary (ongoing): Own the SRS, ERD, user journey and about 40 user stories for reboundary and compensation.

Mobilus Dashboard BI (2026) – Project Analyst

- BI and finance reporting portal for a Malaysian cooperative finance client, built on a data warehouse with SSRS reports and dashboards (Angular, Metabase).
- Specified 37 SSRS finance report layouts (receipts, payments, vouchers, claims, profit and loss, cash book) plus data warehouse queries, report filters and Excel export.
- Reviewed UAT results with the client and created follow-up tasks. The project reached handover (BAST) and invoicing.

Panah Merah (2025) – System Analyst

- Developed and maintained a CMS website used by Panah Merah to store advertising assets for all clients and users who need these materials for marketing.
- Designed the application process flow to support efficient advertisement asset management.

Javan Cipta Solusi (2025) – System Analyst

- Web-based WhatsApp blasting application using a third-party WhatsApp integration to automate message distribution.
- Defined requirements and workflows with developers and stakeholders, and validated reliable message delivery.

Gemi (2026) – Personal Project (https://github.com/AHanif52/gemi)

- Offline personal finance app for Android. Wrote the BRD, designed a 21-screen prototype, then built it in Flutter with encrypted local storage, PIN lock and budget reports (v1.0.1).

As Programmer

LigaEnggres – Mobile/Android (https://github.com/AHanif52/LigaEnggres)

- English league club list app with clean architecture, Kotlin coroutines, database encryption and dependency injection using Koin. Role: Frontend. Tech Stack: Kotlin, Android Studio.

Village API – Back End Project (https://github.com/AHanif52/memento-mori)

- REST API for Indonesian village data, built with CodeIgniter 3 and rebuilt with Laravel. Role: Backend. Tech Stack: PHP, CodeIgniter 3, Laravel.

SKILLS SUMMARY

- **Analysis:** Requirement Gathering, Business Process Analysis, User Stories, Acceptance Criteria, User Journey, BRD/SRS, User Acceptance Testing (UAT), Scope Management.
- **Modeling & Design:** BPMN, Camunda Modeler, ERD, draw.io, dbdiagram.io, Figma, Balsamiq.
- **Testing:** API and UI Testing, Test Cases, Postman, APIdog, Playwright, QATouch, Sentry.
- **Data & Reporting:** SQL, PostgreSQL, MySQL, SSRS, Metabase, DataGrip, DBeaver, pgAdmin.
- **Project Management Methodologies:** Scrum-Agile, Waterfall, Gantt Chart Planning, ActiveCollab, Taiga, Notion.
- **Programming Language:** HTML, CSS, JavaScript, PHP, Laravel, CodeIgniter, React, TypeScript, Kotlin, Flutter.
- **Language:** Indonesian (Native) and English (Intermediate).
- **Soft Skills:** Stakeholder Communication, Setting Realistic Goals, Willingness to Learn, Adaptability.
